1. About Muslim Aid Pakistan:

Muslim Aid is a UK based Islamic charity NGO. It was established in 1985 in response to the 1983–85 famine in Ethiopia, by 23 organizations based in Britain. Over the past 25 years Muslim Aid has grown from a small office in London to an international UK NGO, providing relief and development programmes in over 70 countries across the globe. Whilst continuing to carry on its commitment to emergency relief work Muslim Aid also began to implement long-term development programmes. Today, water, healthcare, shelter and construction programs Muslim Aid believes that in order to really help people, the causes, not just the symptoms of poverty must be addressed. By 1994 long-term development projects accounted for almost 50% of Muslim Aid's relief activity. As well as helping people overcome crises, Muslim Aid provides skills and resources to assist people to move forward to a better life. Muslim Aid works closely with the communities to deliver its programmes and remains committed to working in collaboration with all its beneficiaries to ensure that the solutions are not imposed from the outside. All solutions are culturally sensitive, practical and owned by the beneficiaries. Muslim Aid entered Pakistan after the devastating earthquake in 2005. It provided emergency relief and rehabilitation services to the people affected by the earthquake. Since 2005, our country office has provided support to over 2.9 million people affected by natural disaster, poverty and political tensions.

We work with the Pakistani people and government to achieve the UN Sustainable Development Goals, improving people's lives and prospects. We are passionate about long-term development programmes that improve the education of all people across the country so that they may enjoy a bright future free from poverty.

2. Background:

The northern parts of Pakistan, particularly Chitral, have been witnessing the impacts of climate change, which are manifesting through various environmental and social challenges. Increasing temperatures, altered rainfall patterns, and erratic weather events have become more frequent, leading to shifts in the region's ecology and natural resources. Glacier melt and changes in snowmelt patterns have affected water availability and river flow, impacting agriculture, livelihoods, and overall water security in the region. Situated in a mountainous region, Chitral is naturally prone to flash floods as it is located in the Hindu Kush Mountains, which creates a funnel effect, channeling rain and snowmelt into narrow valleys, increasing the risk of flooding. As climate change is causing the glaciers in the Hindu Kush Mountains to melt rapidly, the melt water is adding to the already high levels of precipitation in the region, making flash floods a regular occurrence.

In direct response to the urgent and devastating consequence of the recent rains and flash floods in Chitral, Muslim Aid Pakistan is implementing comprehensive intervention strategy of Chitral Recovery: "Empowering communities through recovery initiatives" a 14 months project funded by MAUK and MAUS. The project aims is to restore the living conditions of 1,000 floods affected HHs. This initiative is designed to offer both immediate relief and sustained recovery support to restore the livelihood of affected communities in Chitral. The project is strategically designed to not only address the pressing challenges faced by those affected by flooding but also to lay the foundation for enduring and sustainable development, enhancing resilience in the region.

The project also aims to promote awareness about climate change, its impact on life and livelihood, adaptation to local conditions, and strengthening resilience among farmer groups. Muslim Aid Pakistan will identify 100 beneficiaries for Agriculture and Water Management initiatives to help these vulnerable beneficiaries enhance their capabilities. To identify training needs and gaps, the Individual Consultant will work closely with the government's Agriculture and Water Management departments. In the same relationship, the Individual Consultant will develop a capacity building agenda for Climate Smart

OUR VISION

A world of peace, compassion and justice where all people achieve fulfillment.

OUR MISSION

To tackle poverty and its causes by developing innovative and sustainable solutions.

OUR VALUES

Each person has the right to live and be treated with respect and dignity.

Agriculture and Adaptation strategies to be implemented in both districts (Upper and Lower Chitral). While the Agriculture Department will support in demonstrating in research and extension activities The same farmer groups will have exposure visits to the Climate Resilient Agriculture Practice/ Demonstration areas and visualize the real sense of Climate Smart Adaptation. This will create a sense of awareness about Climate Change Adaptation, learn how to adapt these practices on ground with the support of Government officials and improve their living standards. In the same connection, a joint Climate Adaptation plan will be developed for farmers for crops and orchards with the support from Agriculture and water Management Departments and a future Action Plan will be developed for Climate Adaptation and resilience jointly with Farmers and Government Departments for the adaptation of climate-induced cropping pattern /crops will help in their continuous agricultural activities and ensuring for the source of their sustenance livelihood.

Keeping in view the critical importance of the subject, Muslim Aid Pakistan is intending to design a two-days training for each training batch to raise awareness of this issue among selected beneficiaries in upper and lower Chitral.

3. General objectives of the assignment:

The overall objective of this assignment is to train a cadre of 100 selected farmers in 2 targeted districts lower and upper Chitral. For creating awareness about the devastating changes in Climate pattern and its worse effect on agriculture and its impacts on the life and livelihood; adaptation to the local conditions and improving with creating resilience among the farmer groups. The scope of general aims will be as follows:

- To work closely with the **Government Agriculture and Water Management Departments** and identify the training needs and gaps.
- Develop the **capacity building agenda** for **Climate Smart Agriculture** and Adaptation measures to be carried out at both districts (**Upper and Lower Chitral**).
- Increasing access to high quality information about the impacts of climate change, weather cycle on **economic activity**, by linking with the current scenario and keeping in view the **mountain climate resilient** strategy.
- Coordinate with Agriculture Department to support in demonstrating in **research and extension activities**.
- The same **Farmer groups** will have **Exposure visits** to the Climate Resilient Agriculture center established by Government, where they visualized the current Practice/ Demonstration real sense of Climate Smart Adaptation.
- These farmers will learn modern and **climate resilient adopted techniques** to further replicate these practices into their respective areas
- Develop joint Climate Adaptation plan of farmers for crops and orchards with the support from Agriculture and water Management Departments and a future **Action Plan** will be developed for **Climate Adaptation and resilience** jointly with **Farmers and Government Departments** for the **adaptation of climate-induced cropping pattern /crops** will help in their continuous agricultural activities and ensuring for the source of their sustenance livelihood.

4. Specific objectives of the assignment for individual consultant:

- To design and deliver 4 Trainings of selected participants, each training will conduct for 2 days with maximum 25-28 farmers with the consultation of Muslim Aid Chitral team.

OUR VISION

A world of peace, compassion and justice where all people achieve fulfillment.

OUR MISSION

To tackle poverty and its causes by developing innovative and sustainable solutions.

OUR VALUES
